

Co-Workair

designed by Hyunkoo Lee (A)

Concept

Many people have bad habits. For example shaking legs or dozing when they seat on the chair. This kinds of bad habits make people lose efficiency and concentration for their work or study. Co-Workair helps you to fix this kind of habits so you can fully focus on your works. When you shake your legs or lose balance since you are dozing, your legs are spicely simulated by acupressure plate. It makes you to reflect on yourself and fix your habits by your will directly and intuitively. From today, start your work with best condition, with your best co-worker "Co-Workair".

How to Use

Put your feet on the footrest which is placed at the down part of Co-Workair. Your foot's front should be located at the front of the footrest and middle of your sole should be located on the wood cylinder. Accurately constructed architecture will automatically keep balance so footrest and your feet will be fixed horizontally. However, when you shake your legs or doze while you are seating on Co-Workair, Center of the gravity will be changed and footrest will be slanted. Finally, acupressure plate comes out from below side of your legs and give you stimulations to give you feedback, you are keep doing bad habit now.
